Recent Game Design graduate with a Computer Science minor and hands-on experience developing multiplayer gameplay systems in Unity and Unreal Engine using C# and C++. Experienced with networking, Steam integration, gameplay architecture, Git workflows, and collaborative development pipelines. Seeking gameplay engineering or software engineering opportunities in game development.

EDUCATION

Fitchburg State University, BS, Game Design - Minor, Computer Science, 2022-2026
Champlain College Game Design, Game Programming studies, 2019-2021

EXPERIENCE

[CaliGO!](#) - Multiplayer Party Game, 2026-current/ Fitchburg, MA

Unity | C# | Steamworks | P2P Networking

Roles: Lead engineer, Network engineer, Steam Production, UI/UX, System engineer

- Collaborated in an agile development environment with daily standups and cross-disciplinary coordination.
 - Coordinated Git workflows and merge management for an 8-person multidisciplinary development team.
 - Established engineering workflows and repository organization standards for the development team.
 - Implemented peer-to-peer multiplayer networking and player initialization systems using Steamworks and PurrNet in Unity.
 - Implemented the Game Manager, which involved registering player information, syncing game scenes and states, and player scores / results.
-

Package Handler - FedEx Ground 2021-current / Boylston, MA

- Managed and sorted high volumes of packages in a fast-paced warehouse environment.
 - Follow strict DOT, OSHA, FAA, and safety regulations.
 - Assisted in onboarding and training of new hires.
-

Groundskeeper - Westminster Country Club, 2018-2019 / Westminster, MA

- Maintained golf course grounds and ensured high presentation standards.
-

SKILLS

Programming Languages: C#, C++, Python, JavaScript, HTML, Blueprint

Engines/Tools: Unity, Unreal Engine 5, Git/GitHub

Areas: Gameplay Programming, Multiplayer Systems, UI Systems
